

Signs7 Installation Resources

Printing • Preparation • Installation

Pre-Installation Checklist

- Artwork approved and final measurements confirmed
- Surface condition verified (clean, dry, stable)
- Access, parking, and equipment needs confirmed
- Site contact + arrival instructions confirmed
- Install expectations and deadlines clarified

File Setup Guide (Window & Wall)

- Include bleed / trim and respect safe zones
- Panel large graphics with consistent overlap
- Confirm scale at 100% before print
- Outline fonts / embed images; export print-ready PDF
- Choose installer-approved materials for the surface

Common Installation Mistakes

- Incorrect measurements or missing site verification
- Wrong material for the surface or environment
- Ignoring texture, dust, or temperature conditions
- No site photos / unclear install instructions
- Rushing alignment and finishing steps

Why Signs7

- Installation specialists with print-aware support
- Help with file review and printing recommendations
- Can connect you with trusted print partners
- Fewer reprints, delays, and install-day surprises
